

UBIX DISCONTINUATION NOTICE

Northampton, 28/04/2020

Dear Customer,

Our mission is to deliver industry leading safety products and solutions that help keep workers safe and productive. We strive to deliver the best customer experience to you, our valued partners, and for your customers.

To help achieve these goals, particularly during these challenging times, we have made an extensive portfolio assessment to shape where we should prioritize investments moving forward. As a result, we have made decisions to phase out product families that add high complexity to serving customers but have low interest and orders from our Customers.

Starting today, we are going to phase out our Temporary Roofing offering, that is our UBIX product family. You can find the list of part numbers involved in the Appendix.

Last purchase

To give you the opportunity to make a last purchase, we will accept new orders until 13/06/2020 for any of the product in the list. After that date, we will deliver all the remaining open orders before making the product discontinued and totally unavailable.

Destocking promotion

We have a certain amount of stock on the shelf. Products on stock will be offered at a discounted rate, while stock lasts. Please contact your Sales Representative for more information about pricing and availability.

Engineering support

After the date of 13/06/2020 we will not be able to offer any service of technical support or calculations for UBIX. If you or your customer need a calculation, you can reach out to our Engineering Sales support (also after 13/06/2020) and we will provide to you the information required, so that you or a third party engineer can perform the calculation.

We thank you for having supported UBIX until now and we look forward to continuing the partnership with you for the core range of our safety portfolio.

Best regards

Luca Favarin
